

How to draw a thylacine

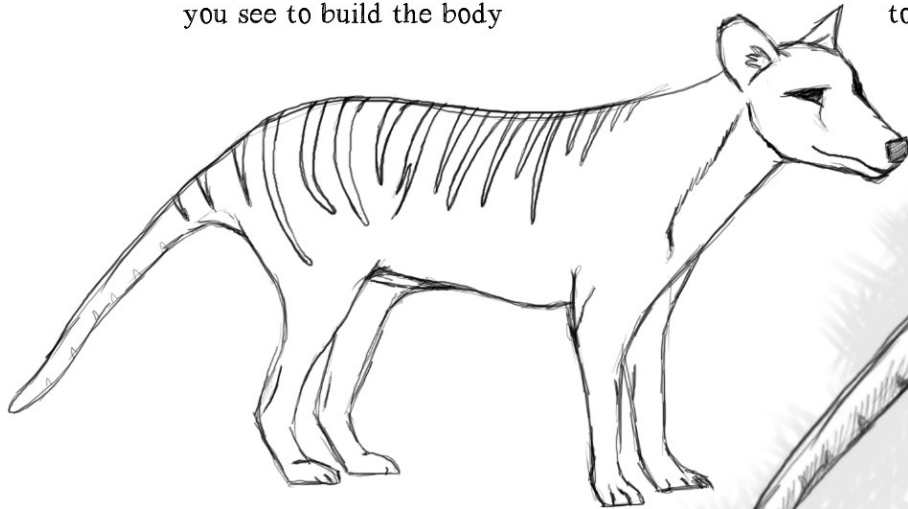

1. find and draw the shapes you see to build the body

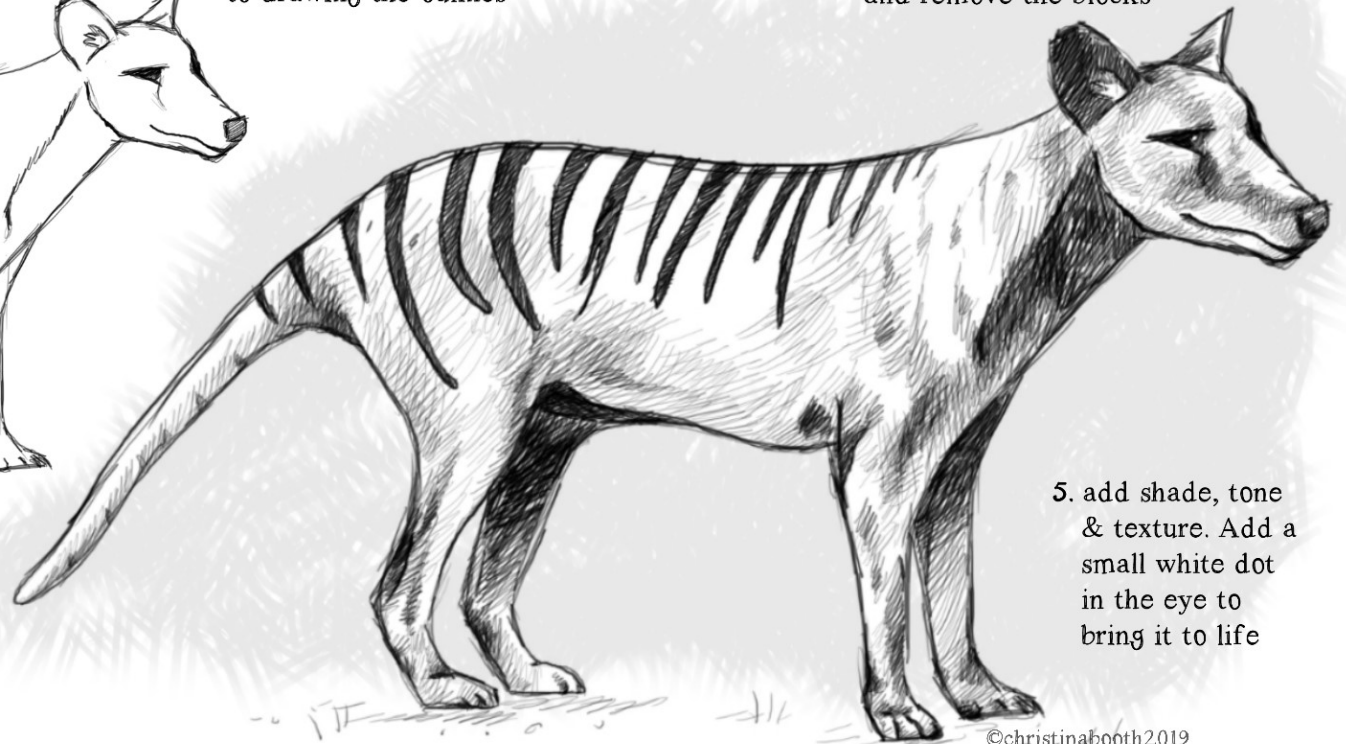

2. the blocks are your map to drawing the outlines

3. lightly sketch in the outlines and remove the blocks

4. make any small corrections needed. Remember to look at the image to see what it should look like. Add the finer details.

5. add shade, tone & texture. Add a small white dot in the eye to bring it to life
